

Engineering Solar Panel Quick Assembly Tutorial

Overview

Note that we have mentioned the costs of some of the unusual items, and prices are in UK pounds. 1. Flux pen, bus wire, tabbing wire. Cost: These can be bought together through. Remember to sand the sharp edges and rough areas if necessary. Draw 10 squares (12.5 cm x 12.5 cm) in pencil on the one side of the wood. Leave 1cm space. Glue the cells on the wooden board. One person should carefully hold the five cells up while another person applies glue (glue gun) on the board underneath one cell. Do this for each cell. Make sure to place the positive end of one line beside the negative end of the other. To assemble the cells you are now going to solder the negative part of the cells (the bottom). This section is similar to section 4. WARNING: This side is. Cut two small bus wires (less than length of cell) and one long one (double the cell length). Glue them at 2-3 cm from the cells. One person applies the glue and the other the bus wire. Don't try to remove the glue. If it is unavoidable, be very careful. The glue is attached to the.
