

High-temperature resistant energy storage cabinet for emergency rescue

Overview

Built to meet the requirements of EN 14470-1 and designed in reference to VDMA 24994, the cabinet features a 90-minute fire-resistant structure, integrated smoke detection, and automatic power cut-off in case of fire. Portable energy storage cabinets, with their convenience and efficiency, have become an indispensable power solution in emergency rescues. The "all-in-one" design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, efficient, and flexible. The SYSBEL SE490450 EN Fire Resistant Battery Charging Cabinet provides secure charging and storage for lithium-ion batteries while meeting strict international safety standards. The ION-LINE cabinet models are specifically designed to meet the highest safety standards. Firstly, the application of battery charging safety.
