

How long does it take to get a payback for 80kW solar power generation

Overview

Combined costs (\$28,505) ÷ annual savings (\$2,822) = solar payback period (10.1 years) In this example, you'd break even in about 10. After that, you'd have roughly 15-20 more years of free electricity—adding up to significant long-term. Solar payback period is the time it takes for electricity savings, export credits, and incentives to recover the net cost of a solar PV system. High-cost electricity areas like California and the Northeast offer the fastest returns. For the average solar shopper, that translates to around \$61,093 in savings over 25 years. Federal Solar Tax Credit — 2026 Update [△](#) The 30% federal solar tax credit (Section 25D) expired December. How long will it take for solar panels to pay for themselves?

In seconds, you can calculate: The results are based on typical residential solar pricing and electricity rates, giving you a realistic financial projection before requesting installer quotes.
