

Maintenance of solar equipment

Overview

Solar panels have no moving parts, which makes them relatively low maintenance. But if you want to reduce solar panel costs and maintenance over time, you'll need to look after them. Here are a few tips. To limit having to pay for any repairs, you need to get your solar panels serviced at least once every 5-10 years. A solar panel service will set you back around £100, but it will also prevent. If mounting your roof to clean your panels isn't an option for you, you can install automated cleaners that work like sprinkler systems. You can also hire a professional to come to your house. Solar panels in the UK do not typically need extra maintenance, since the UK climate is generally favourable to them. According to manufacturers' standards, 25°C is the optimum temperature. Overall, the average solar panel system isn't very high maintenance. It'll end up costing you around £100 every five years for the annual service, plus any costs for the cleaning equipment.
