

Make your own solar power station

Overview

Mid-Grade Battery Option (AGM): 100 Amp Hour AGM Battery Highest Quality Battery Option (LiFePO4): LiTime 100Ah Deep Cycle LiFePO4 Battery 100 Watt Solar Panel DeWalt Tool Box Solar Charge Controller Fuse Block USB Socket Panel (I Purchased 2) Main On/Off Switch Battery Capacity Monitor SAE. Now that you've gathered everything you need for your DIY solar power station, it's time to get building! I began by drawing up a crude wiring diagram on. One important factor to consider when building this DIY solar power station: Since I've gone with a flooded lead-acid battery, it is extremely important to not drain the capacity past 50%. This is due to something called depth of discharge (D.O.D). Flooded lead-acid. We'd love to hear from you and see how your DIY power station turned out! DM us a photo or video of your project in action. Have any questions?
