

Solar photovoltaic power generation in Austria

Overview

Solar power in Austria contributes 8. In addition to supporting PV installations through permitting simplification and cash grants, the Austrian. In 2024, Austria achieved another year of record photovoltaic (PV) deployment, adding 2. 51 GW of new capacity and bringing cumulative installations to 9. Key highlights of the report:.. This report provides an in-depth analysis of Austria's PV market and developments over the past year. News + Stories: The Renewable Energy Expansion Act (EAG) provides for an additional 11 TWh of annual electricity generation from PV systems in Austria by 2030 compared to 2020. That would be a total of 13 TWh. Is this a realistic goal?

Sonja Wogrin: Absolutely! We are currently well on the way to. Austria's photovoltaic market slowed in 2025, with around 1,634 MW of new capacity installed, bringing the country's total PV capacity to approximately 9.

Article Content

Renewable energies

Renewable energies are the economic engine of the future worldwide. Here you can find selected data on Austria's renewable energy sector.

Austria Renewable Power Generation

Austria Renewable Power Generation Austria's "Renewables Expansion Law" (EAG), adopted in March of 2021, is a significant milestone toward the ambitious goal to produce 100% of the country's

Solar PV in Austria

According to GlobalData, solar PV accounted for 19% of Austria's total installed power generation capacity and 8% of total power generation in 2023. GlobalData uses proprietary data and

National Survey Report of PV Power Applications in AUSTRIA

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCP's within the IEA and was established in 1993. The mission of the programme is to "enhance the international collaborative

ENERGY PROFILE Austria

Indicators of renewable resource potential Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr).

Solar PV in Austria

Solar PV accounted for 19% of Austria's total installed power generation capacity and 8% of total power generation in 2023.

Hier finden Sie aktuelle Daten und Fakten zur Photovoltaik. Interessante Grafiken, Marktstatistiken, Studien, Roadmaps und vieles mehr! "Die Umwandlung von

National Survey Report of PV Power Applications in Austria 2024

The Austrian PV sector supported approximately 12,100 full-time jobs in 2024, primarily in installation, distribution, and manufacturing. Domestic module production reached 70 MW, with manufacturers

National Survey Report of PV Power Applications in Austria 2023

This report provides an in-depth analysis of Austria's PV market and developments over the past year. 2023 was a landmark year for PV installations in Austria, with a total of 2.6 GW of new photovoltaic

Solar power generation | Austria (1983–2024) – Data, Charts & Analysis

Official data of Austria for all available years in an easy-to-read format. Solar power generation: historical data, charts, comparisons, and downloadable datasets. Explore trends, growth

Solar power in Austria

Apr 2, 2012· Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

The power of renewables: how our electricity system works

Taking wind, biomass and solar into account, renewable power generation rises to more than three-quarters of the country's total electricity production. Austria's last

Austria deploys 1.63 GW of solar in 2025

Austria added 2,084 MW of PV in 2024 and 2,474 MW in 2023, which remains the country's record year for new installations. The country's cumulative PV capacity reached

Zwentendorf Nuclear Power Plant

The Zwentendorf Nuclear Power Plant was the first commercial nuclear plant for electric power generation built in Austria, of three nuclear plants originally

Austria Solar Report

The Austrian government has set ambitious targets to achieve 100% renewable electricity by 2030, necessitating the addition of substantial renewable capacity, particularly in solar and wind energy.
