

Ultra-large battery pack for energy storage power station

Overview

Megapack is a powerful, integrated battery system that provides clean, reliable, cost-effective energy storage to help stabilize the grid and prevent outages. Reducing our reliance on fossil fuels and strengthening our grid infrastructure will make sustainable energy more accessible and affordable. January 31, 2026 – The world's first 400MWh energy storage station utilizing 628Ah ultra-large battery cells at scale was officially connected to the grid. The station is equipped with 80 sets of Mr. Giant 5MWh DC energy storage systems (integrating 628Ah cells with minimalist design) and 40 sets. Megapack enables low-cost, high-density commercial and utility projects at large scale. It ships ready to install with fully integrated battery modules, inverters, and thermal systems. Have Questions?

By placing a deposit, I agree to the Megapack Reservation Terms, Megapack Maintenance Agreement. The Tesla Megapack is a large-scale rechargeable lithium-ion battery stationary energy storage product, intended for use at battery storage power stations, manufactured by Tesla Energy, the energy subsidiary of Tesla, Inc. Launched in 2019, a Megapack can store up to 3.9 megawatt-hours (MWh) of energy. SHIJIAZHUANG, China, Feb.
