

Uruguay Solar Panel Project

Overview

Uruguay's state utility is advancing a major solar PV project in Cerro Largo, expected to come online by 2028, while two additional photovoltaic parks are set to be announced before year-end, reinforcing the country's renewable energy expansion. Uruguay has unveiled the construction plans for the. The combination of solar and wind power boosts the resilience of the country's electricity system (Image: Jimmy Baikovicius / Flickr The country already has a 94% renewable electricity mix, but plans to diversify by adding more than 100MW of solar by 2026. But while 46% of those sources are. UTE, the state-owned power company of Uruguay, started the construction of a 100 MW solar power plant Melo in the Cerro-Largo department. Technology GmbH is a German engineering company specializing in turnkey solar module production lines and manufacturing consulting, with project experience ranging from 20 MW to 500 MW per production line, including multi-line and gigafactory projects exceeding this scale.

Article Content

Analysis: Uruguay expands solar energy as electricity

“Electricity produced with photovoltaic panels is cheaper than that produced with wind turbines.” Projects underway The Punta del Tigre project

Analysis: Uruguay expands solar energy as electricity demand increases

The Punta del Tigre project was awarded to a consortium comprised of the Spanish company Prodiel Energy and Uruguay's Teyma in October 2024, serving as a pilot to evaluate

Solar power growing in Uruguay

Big picture Uruguay is a global leader in renewable energy, generating ~99% of its electricity from renewables (wind, hydro, biomass, and solar). Solar is still a small but expanding

Uruguay: Towards a 100% renewable energy matrix by

Uruguay already produces more than 90% of its electricity from renewable energy. The country has led the adoption of wind and solar energy in the region. Key

Uruguay, pioneer in renewable energy: a model for the

In 2009, Uruguay began auctions in which wind companies from around the world competed to offer the cheapest renewable energy to the

How Uruguay ditched fossil fuels for renewables

Ramón Méndez Galain helped Uruguay decarbonize its grid in just five years, with 98 percent of its energy coming from renewable sources.

Uruguay will expand wind and solar parks in response to energy

A report from the Ministry of Industry, Energy, and Mining (MIEM) reveals that Uruguay will need to expand its capacity for renewable energy generation to meet the growing demand in the

Energía solar en Uruguay | Ministerio de Industria, Energía y Minería

Es en este marco se viene desarrollando la Energía Solar en Uruguay. Los esfuerzos se han concentrado en la investigación del recurso solar, el desarrollo de la energía solar térmica para el

Energía solar | Ministerio de Industria, Energía y Minería

Este boletín presenta un análisis cuantitativo y cualitativo de la evolución de la energía solar entre 2014 y 2024, comparando los avances globales y nacionales, destacando innovaciones...

Uruguay lanza su mayor proyecto de energía solar fotovoltaica con

Uruguay's state utility is advancing a major solar PV project in Cerro Largo, expected to come online by 2028, while two additional photovoltaic parks are set to be announced before year-end, reinforcing

Uruguay's UTE breaks ground on 100-MWp solar project

Uruguay's government-owned power company has announced the start of construction of its 100-MWp Melo solar farm in the department of Cerro

Uruguay's Renewable Charge: A Small Nation, A Big

Uruguay built a power grid that runs 99% on renewables—at half the cost of fossil fuels. Here's how its bold energy overhaul became a global model.

Uruguay Expands Solar Energy as Electricity Demand Increases

Solar panels installed at a school in Jaureguiberry, department of Canelones, Uruguay. The combination of solar and wind power boosts the resilience of the country's electricity system (Image: Jimmy

Four ways Uruguay combats climate change | World

Uruguay is one of the world's most sustainable countries. Renewable energy is helping to cut more than half a billion dollars from the country's annual

Uruguay's 98% Clean Power Shift – What It Means for Business

Uruguay achieved 98% renewable electricity in just 15 years—without subsidies or aid. Discover the strategy behind it, and how EcoSync is applying this model globally.

How Uruguay Relies Almost Completely on Renewable

Solar panels on a rooftop of a building at the Council for Scientific and Industrial Research (CSIR) campus in Pretoria, South Africa, on November 24,

Uruguay launches its largest solar PV project with US\$75 million

Uruguay's state utility is advancing a major solar PV project in Cerro Largo, expected to come online by 2028, while two additional photovoltaic parks are set to be announced before year

Energía solar en Uruguay | Ministerio de Industria, Energía y Minería

La Política Energética del Uruguay 2005-2030 establece la necesidad de diversificar la matriz energética, especialmente a partir de energías renovables y autóctonas. Es en este marco se viene

Uruguay is building the biggest solar power plant with capacity 100 MW

UTE, the state-owned power company of Uruguay, started the construction of a 100 MW solar power plant Melo in the Cerro-Largo department. The plant will become the largest facility of

Uruguay Solar Report

Uruguay's solar PV capacity has grown from virtually zero in 2013 to 248 MW in 2020. The government aims to increase solar PV capacity to 1 GW by 2025. Residential on-grid solar installations are

Uruguay Expands Solar Energy as Electricity Demand

The Punta del Tigre project was awarded to a consortium comprised of the Spanish company Prodiel Energy and Uruguay's Teyma in October 2024, serving as a

Uruguay is building the biggest solar power plant with capacity 100

The project is being implemented in partnership with the Uruguayan company Teyma and the Spanish Prodiel. Those are responsible for design and construction of the plant, as well as will
